Projects

Creative Agency -A Service Selling Website(Full-Stack)/ Website Link/ Github

Technology: React, Node.js, MongoDB, Express.js, Firebase Auth, Bootstrap, Heroku

- Creating a dashboard that is used to view ordered lists, make an admin with email & add service with picture and displaying it on the UI from DB.
- Order page & admin dashboard are separated from users and admin.
- Users can place the order, give feedback & see only their ordered service list.
- Saving jwt token to the session Storage that can save user info after reloading.

Volunteer Network -A Event Manger(Full-Stack)/ Website Link/ Github Repo

Technology: React, Node.js, MongoDB, Express.js, Firebase Auth, Material-UI, Heroku

- Users can register for the Event and see their own registered list and cancel the registered event.
- Admin can see all user's registered lists, delete the registration and add Event.
- Google Login, firebase hosting, context API.

Doctors Potal -A Clinic Management system (Full-Stack)/ Website Link/ Github Repo

Technology: React, Node.js, MongoDB, Express.js, Firebase Auth, Material-UI, Heroku

- Users can choose doctors and make an appointment, can see own appointment list by data
- Admin can update, approve, cancel appointment status.
- React Calendar with custom design, React Hook Form, PopUp Dialog, custom select design
- Admin can view all patient's appointments, all patients, today's appointment, pending appointment, prescription status and add doctors.
